

# What is waste and how to dispose of your waste

Learn about different types of waste and how to dispose them.

Wastes are objects or materials that are unwanted or unusable to anyone.

Two main categories of waste

Organic waste

VS

Inorganic waste

Organic waste comes from plants and animals, for example., food waste, green waste (leaves, twigs etc) cardboard, paper etc.

Inorganic waste is made up of materials that do not decompose, for example., plastics, metal, glass, concrete etc.
